PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of hands-on experience designing, building, and deploying end-to-end web applications across React frontends and Node.js/Express backends. Delivered 10+ live projects spanning e-commerce platforms, AI assistants, ML security systems, and data dashboards. First Prize winner at NEURA '25 AI Hackathon. Holds 15+ technical certifications in AI, cloud, and data engineering. Comfortable owning the entire product lifecycle from schema design and REST API architecture to CI/CD deployment on cloud platforms.

EDUCATION

B.Tech - Information Technology, Anna University, Chennai 2023 – 2027
CGPA: 8.5 / 10 Relevant: DBMS, OS, Software Engineering, Web Technologies, Data Structures, AI/ML

TECHNICAL SKILLS

Frontend React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Router, Vite, React Hook Form	Backend Node.js, Express.js, Flask, FastAPI, REST API Design, JWT Authentication
Databases Firebase (Firestore + Auth), MongoDB, MySQL, SQLite, Supabase, PotgresSql	AI / ML Python, Scikit-learn, TensorFlow, ChatGPT API, Azure AI, n8n Agent Builder, Pandas, NumPy
Cloud Amazon Cloud Platform, Vercel, Netlify, Firebase Hosting, Render	Tools Git, GitHub, Postman, Docker (basics), Jupyter Notebook, Power BI
Payments Razorpay API secure checkout, webhook handling	

ACHIEVEMENTS & CERTIFICATIONS

- First Prize NEURA '25 AI Hackathon** 01/09/2025
recognised for AI-based automation innovation aligned with UN SDG-4.
- Team Leader - IBM NM Hackathon**
led team from problem scoping through prototype delivery in a 24-hour constraint.
- 15+ Certifications**
Azure AI Fundamentals (Microsoft), Google Cloud Security, GenAI Powered Data Analytics (Forage), Generative AI Concepts, Python Programming, Google Analytics.
- 10+ independently built and deployed projects**
across full-stack web, ML, AI, and data analytics domains.

PROJECTS

ColadMailForge, Cold Email sender 06/2026
I've built several real-world projects including a full-stack food delivery platform with payment integration, an AI voice assistant using OpenAI API, and an ML-based threat detection system. These projects gave me strong hands-on experience in React, Node.js, and AI-driven application development.

studytrackerapp , <i>FocusFlow</i>	02/2026
Built FocusFlow, a Flutter-based study tracker with session tracking, goal management, heatmap analytics, and gamification features like XP, streaks, and levels.	
Smart Library Management System , <i>Library Management</i>	03/2026 – 03/2026
Developed a Smart Library Management System using React, FastAPI, and MongoDB with JWT authentication and role-based access. Implemented OOP principles in backend design and built scalable APIs for managing books, users, and transactions.	
Full-Stack Food Delivery Platform , <i>metro merchi</i>	04/2025 – 07/2025
Developed a full-stack food ordering platform with real-time database updates, online payments, and role-based access. Focused on scalable data handling and seamless user flow across multiple pages.
